

Gasoline V6 & V8 Aquamatic sterndrive

Efficient Power. Smooth Performance.

Discover dynamic performance in a compact package. The Volvo Penta Aquamatic Sterndrive V6 pairs a powerful 6-cylinder, 4.3-liter direct-injected gasoline engine with the precision of the DPS/TCC Duoprop or the SX drive. Freshwater-cooled and fully integrated, this system delivers agile handling, quick acceleration, and a seamless driving experience on the water.

Bold Power. Clean Performance.

Push further with the commanding performance of the Volvo Penta Aquamatic Sterndrive V8. Available in 5.3-liter or 6.2-liter V8 configurations, this freshwater-cooled, direct-injected gasoline engine with catalyst technology offers impressive power with reduced emissions. Coupled with the DPS/TCC Duoprop or SX drive, it delivers outstanding acceleration, smooth control, and refined handling — setting a new standard in marine gas propulsion.

Compact, Lightweight Design

Aluminum engine block and low-friction components enhance the power-to-weight ratio and simplify installation.

Direct Injection Efficiency

Maximizes fuel energy with high compression, reducing both fuel consumption and emissions.

Variable Valve Timing

Optimizes performance across the rpm range for stronger torque and smoother acceleration.

Freshwater Cooling System

Closed-loop cooling prevents internal corrosion, extending engine life and boosting resale value.

Easy Drain System

Drains raw water in minutes—even while afloat—thanks to a smart anti-siphon valve design.

Electronic Vessel Control

Add features such as Glass Cockpit, Joystick Docking and Dynamic Positioning to enhance your experience.

V6-200/250/280

Excluding propeller, only complete package

15% DISCOUNT

Available: 22 Aug 2025 until 25 Sep 2025

V8-300/350/380/430

Excluding propeller, only complete package

15% DISCOUNT

Available: 22 Aug 2025 until 25 Sep 2025
